How to Keep Your Chicago Area Organization Out of the **Digital Penalty Box.**

REINTIVITY
technology solutions

When your network stalls, so does everything else:

- patients wait,

- classes stop,

- policies freeze,

- and city services craw.

That costly pause, **downtime**, hits small and midsized organizations hardest.
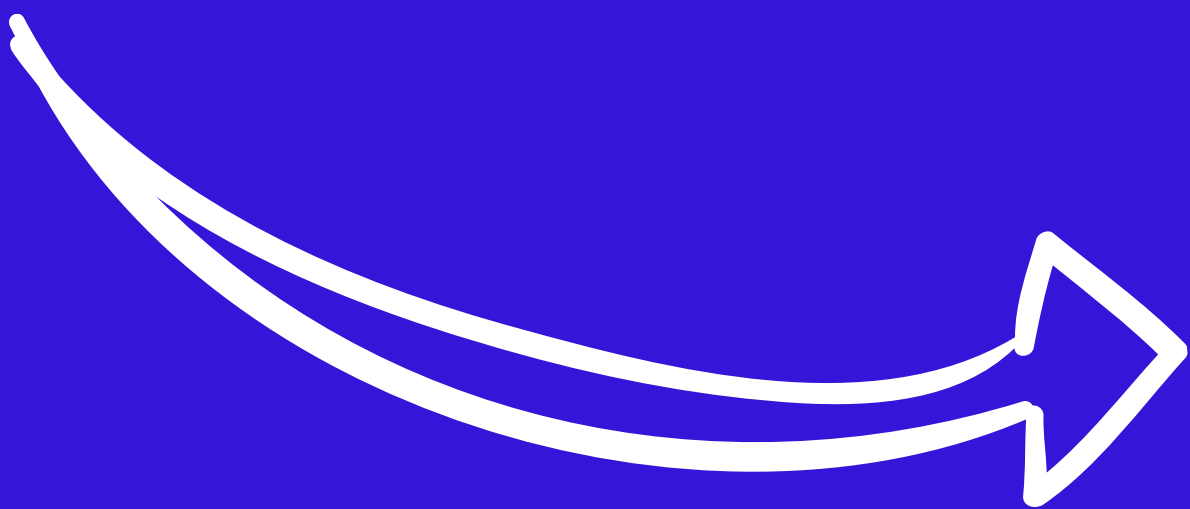

Why Downtime Hurts So Much

Nothing works:

❌ **Critical files** are locked away

❌ Your team **can't login**
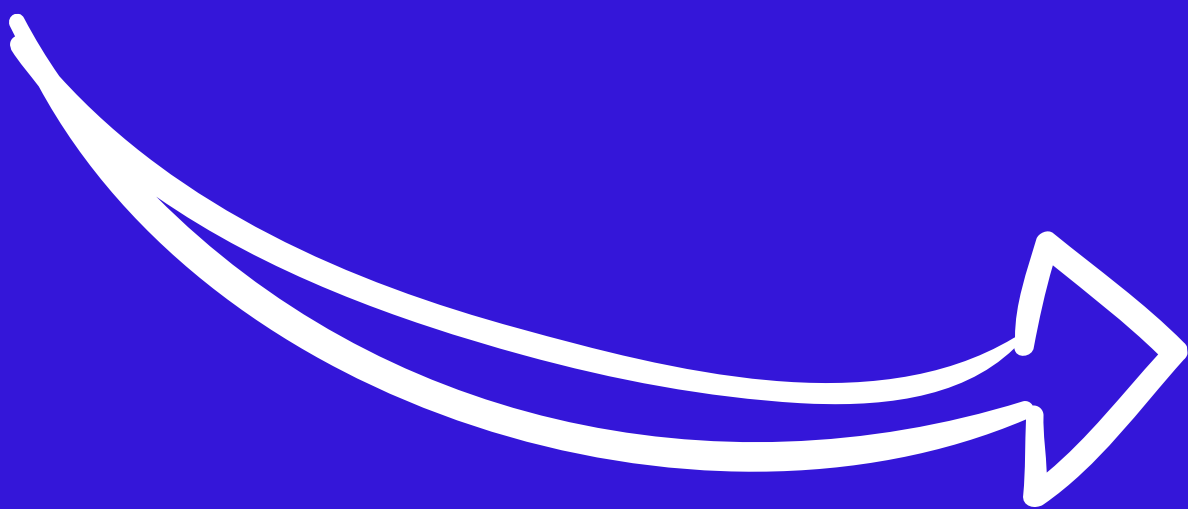

❌ Your customers **are stuck in limbo**

Cash evaporates:

❌ IT outages average **$5,600 per minute**

- enough to fund a scholarship,
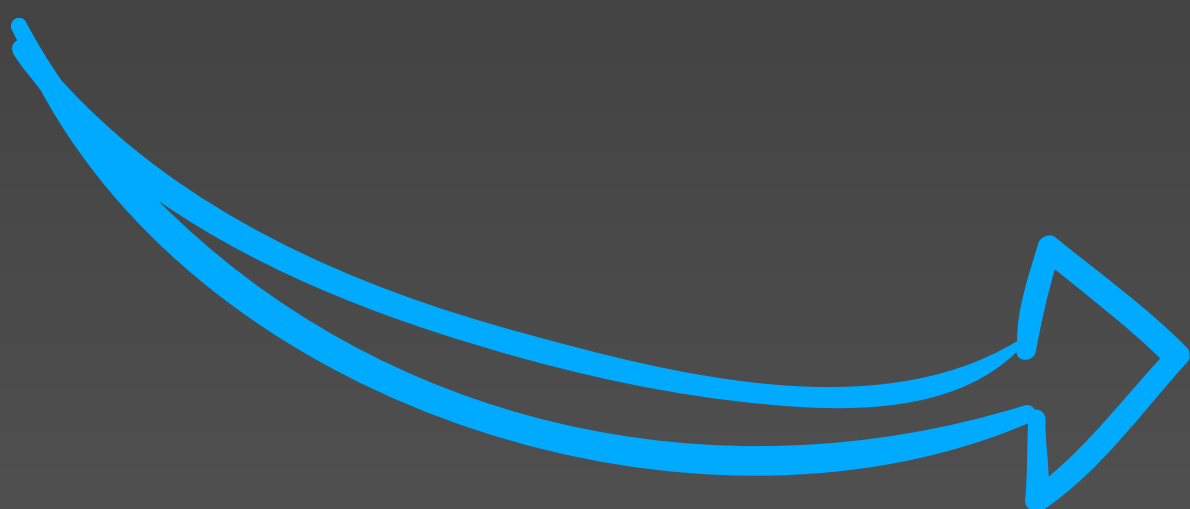

- restock a clinic,

- or run a nonprofit campaign

How It Sneaks Up on You

- ✖ **Ransomware and** other cyberattaks
- ✖ Server or software **failures**
- ✖ **Plain old human slip-ups,** like an accidental delete at 4:59 PM on a Friday

The Real Villain,
Slow Recovery.

Downtime
becomes **expensive** when...

... you don't have reliable, tested backups.

Your Fast-Forward Button

# A well-designed backup/disaster recovery plan lets you:

- ✔ **Capture data** frequently and automatically

- ✔ **Restore** systems in minutes, not days

- ✔ **Keep serving** patients, students, policy holders and citizens without missing a beat

If disaster strikes, backups help you recover quickly…

… **saving time, money, and stress.**

Ready to Stay Ready?

From Oak Park clinics to Hyde Park schools to Loop nonprofits, **our Chicago-based team cuts your downtime risk?**

Let's keep your organization moving—no matter what,
Let's talk.
