

DATA SERVICES FOR BUSINESS INTELLIGENCE

Get actionable insights from your data

How sure are you that your company is getting the most out of the data it generates? You may be losing out on possibilities to use business intelligence (BI) to enhance your business operations and lower your operational expenses if you aren't properly using the data created inside your firm.

The Business Intelligence Practice at Reintivity is comprised of a seasoned and experienced group of consultants that specialize in helping you gain useful insights from your data and turning these discoveries into actions by starting and integrating business processes inside your organization.

Since 2013, Reintivity has been building, administering, and supporting customer solutions based around the Microsoft Data Platform.

**BI and Data
Development,
Management,
Strategy and
Visualization.**

ESSENTIAL FEATURES AND BENEFITS

Reintivity delivers end-to-end Microsoft SQL Data Platform solutions. Many of our Data & Analytics Management clients take advantage of the complete array of BI solutions.

Business Intelligence Discovery and Strategy

Reintivity meets with BI executives to discuss the present condition of the BI solution.

Typical engagements include looking for performance bottlenecks, security issues, and speed/processing improvements in the ETL, data warehouse, and Analysis Services cubes.

Managed Server and Cloud Applications

Reintivity's expertise extends beyond infrastructure to include the business intelligence apps that your company utilizes on a daily basis.

Utilize industry-leading knowledge to maintain and support your business intelligence systems on an ongoing basis. Reintivity helps you by advising you on best practices, adding and maintaining features and functionality, and investigating, answering questions, and resolving issues.

Customized Solutions from Industry Experts

Certified professionals are always ready to assist you and work with you to design your data and business intelligence solution.

Reintivity will help you strategize how you can structure and improve your solution, define the essential metrics and analytics that will be used to track and report on, and develop a strategic implementation plan.

End-to-end Mobile BI implementation

Reintivity's specialists can assist you with anything from business intelligence solution creation to metric tweaking and analysis.

Reintivity will simplify the analytics process, allowing you to identify business efficiencies and significant trends in your data.

System Health Analysis, Patches and Upgrades

Remote deployment, setup and administration, anti-malware and virus management and workstation licensing

Delegate development duties for your business intelligence solution's application of fixes and updates. Reintivity will enable your IT staff focus on higher-value tasks and strategic objectives while ensuring optimal performance.

DEVELOPING UNIQUE SOLUTIONS TO MANAGE YOUR DATA!

Reintivity's Business Intelligence team is entirely dedicated to offering tier one solutions to complex and nuanced BI challenges.

Reinvent your data analysis capabilities.
