

GET A WORLD CLASS WEB PRESENCE THAT WOWS

Invest in growing your online presence

It seems that almost anyone these days can build a website. However, it's not just about building and publishing a website. It is about knowing and using the latest and most effective web technologies to transform your business through web application best-practice strategies.

Whether you are looking to build a new website to establish your organization's web presence or build a highly functional and highly usable web application, it is important you consult with an industry leader and trusted partner.

WEBSITES, WEB PORTALS & MOBILE APPLICATIONS

Our team of experts - comprised of business, marketing, design and development consultants - understand your website is a major part of your interface to customers, partners and employees.

What We Offer

**Web & Mobile App
Development**

**Website Design &
Management**

**Web Hosting & Domain
Management**

At Reintivity, we will work diligently with you to ensure that your vision, complimented by our use-case experience, will make your company's online presence a recognized leader in your industry.

KEEP YOUR WEBSITE UP-TO-DATE!

Websites need to stay updated! A fresh website gets more traffic, doesn't look neglected and helps you communicate better with current and new customers.

Website maintenance is available for websites we build, and we also maintain many existing websites, including sites built by others. Our web maintenance services include:

Software Updates

Stay in sync with the latest features

Malware scans

Identify and remove threats

Back ups

Monthly / Weekly / Daily

SEO Research & Analytics

Get your website noticed and found

Online Analytics

Find trends and amplify your traffic

Maintenance & Fixes

A team dedicate to service requests

Service Requests

Monthly / Weekly / Daily

Security & Publishing

Protect your content and customers

Social Media Marketing

Get your content to your customers where they are

Managed Web Hosting

Keep your site fast, secure and accessible

MANAGED HOSTING & DOMAIN MANAGEMENT

Our Managed Hosting packages add an additional layer of service. With managed hosting, we will tend to the aspects of web host and server management so that you do not have to.

Managed hosting is great for brands that do not want to see the back end of their website and would prefer to stick to more business-focused innovations (i.e., content publishing and exploring other forms of marketing avenues).

Get a world class web presence that wows.
