

MANAGED SOFTWARE TECHNOLOGY SERVICES

Comprehension system monitoring, management & support

If the typical IT "break-fix" approach isn't working, there must be an alternative. At Reintivity, we think there is - one in which IT can provide value to the business while also being proactive in its approach to technology and software.

The concept of Reintivity's modern-day IT service is built on basic, tried-and-true techniques and practices, such as:

- **Regular maintenance evaluations** of all IT equipment to extend computer systems' usability and performance
- **Ensure that security patches** and software upgrades are installed to protect the network and endpoints from both faults and threats
- **Early detection and proactive monitoring** to discover and address issues before they cause downtime and interruption
- **Reporting and tracking** to identify and replace faulty equipment

OUR IT SUPPORT EXPERTS PROVIDE COMPREHENSIVE ASSISTANCE

Every Reintivity customer receives a dedicated IT support team comprised of software technology professionals. Your care team is familiar with your business' operations and can help you navigate the complexity of software and technology.

It all starts with a thorough grasp of your company's specific requirements and assisting you in making plans for future changes. Then we build and maintain a technological infrastructure that offers ongoing assistance for your employees at every stage of the process.
