

VIRTUAL CIO SERVICES

Achieve business objectives with expert guidance and a long-term strategy for your software and technology.

Use our technical expertise, provided as a Virtual CIO (vCIO) or Virtual IT Director service, to bring your most ambitious business ideas into action with fewer risks and lower costs.

Strategic IT and business planning is a high-level process that each company that values growth should prioritize. The easiest approach to align your software and technology needs with your bottom-line company objectives is to hire a vCIO.

As part of our larger IT Consultancy package, Reintivity provides Virtual CIO or Virtual IT Director consulting services leveraging the experience and knowledge we've gained helping clients plan and implement software and technology solutions since 2013.

What we can help you with:

- Project planning
- Research and development
- Project audit and optimization
- Ensuring technical due diligence
- Project scaling
- Best practice management
- Technology evangelist

What is a Virtual CIO?

A Virtual CIO is a distant or virtual entity, such as a contractor or a corporation, that acts as your organization's chief information officer. The Virtual CIO performs the same functions as a traditional CIO. They work with your IT department to develop strategic goals, budget plans, business process analyses, and technological improvements.

A Virtual CIO assists you in maintaining your company's IT infrastructure as well as projecting long-term objectives in the form of a business continuity plan. It's entirely up to you how much decision-making authority you give your Virtual CIO. If your company has a small IT team or none at all, the Virtual CIO can take on additional technology-related tasks.

The Virtual CIO, on the other hand, can act in a strictly consultative capacity, assisting you in aligning your larger business and IT objectives.

LEVERAGE OUR TECHNOLOGY EXPERTISE

With CIO-led research and development, competent strategizing, and professional management, we'll make sure you get the most out of our virtual CIO consulting services, so you can experience technical excellence while reducing risks and lowering expenses.

Project Planning

Your virtual CIO will help you develop a technology plan, strategy and project roadmap, as well as identify the tools and a team to bring your ideas to life.

Ensure Due Diligence

To keep stakeholders happy, your vCIO will help you examine products, tech stacks, workflows and design a product progression roadmaps.

Research and Development

A vCIO will monitor your R&D process, maintain and enhance your present technology and compliance rules, and look for the best-fitting tech solutions.

Project Scaling

The virtual CIO will develop a scaling strategy, design the required integrations, and advise technologists on how to increase scalability.

Project Optimization

A virtual CIO will assist you in developing an optimization strategy and implementing the changes.

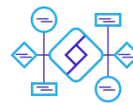

Best Practice Management

Your vCIO will advise you on technology planning best practices to support your growth and bottom-line goals.

Business Continuity

Your vCIO may help you build on existing plans or develop new ones, as well as guide testing and adjustments as needed.

Technology Evangelist

Your virtual CIO is passionate about assisting you in enhancing your firm's use of new software, technology and innovation advancements.
