Companies choose Azure for Windows Server and SQL Server because of its unmatched security

Enterprises already choose Windows Server and SQL Server for their proven security and compliance capabilities.

Today, they're discovering that they not only run best on Azure, but that Azure delivers multiple layers of security, including the secure foundation of our physical datacenters, operational best practices, and engineering processes that follow industry-standard guidelines.

Unmatched security

$1 billion
security investment every year

6.5 trillion
threat signals analyzed daily

3,500
dedicated security experts

90+ compliance offerings

Uncompromising commitment to privacy
